(Z) Less than one-half of the unit of measure specified.

Coal mined by the Mining Services Industries is included in the production shown for the coal industries.

Services establishments were requested to report man-hours by kind of work performed rather than by department. The man-hours so reported have been allocated to the mine department where the service was performed. Thus "Underground" man-hours represent such services as drilling, rock work, timbering, shaft sinking, and mine tunneling; "Strip-pit, auger, culm-bank, and dredge" man-hours represent strip-pit mining, auger mining, and loading culm-bank material; and "Surface" man-hours represent excavating, shop work, hauling from mine to tipple, and other miscellaneous services.
